

# DENVER SRL<sup>®</sup> Pump

*A comprehensive line of soft, rubber-lined pumps designed to fit a wide range of pumping applications from corrosive to abrasive slurries*

SRL silica sand installation

## Design Advantages

### Capacity

- 20-18,000 GPM
- Heads up to 180 feet for continuous service
- Slurries up to 70% solids

### Impellers & Liners

- Replaceable, two-piece liners
- Constructed of natural rubber, neoprene, polyurethane, hypalon or other elastomeric material bonded to metal inserts
- Heavy-duty metal inserts maintain proper hydraulic shape to prevent collapsing under suction lift or surging conditions
- Can be externally adjusted for proper running clearances without opening pump

### Gland Seals

- *Ful-Flush* packing gland for heavy abrasive slurries
- *Lo-Flo* packing gland for light slurries where the lack of seal water requires small quantities of seal water
- *Mechanical* seal where zero leakage of pump fluid is required
- Special *Grease-Lubricated* gland seals are available for special applications

### Slide Maintenance Base (optional)

- Pump can be opened for inspection or parts replacement in minutes without disturbing discharge or suction piping, overhead motor, electrical connections or drive guard

### Casing

- Vertical, split-cast iron case is standard - HD ductile is available for multi-stage or heavy duty applications
- Easily separated for removal and replacement of liners

## Construction Specifications

Part	Standard Construction	Optional Material
Impeller	Natural rubber - ASTM D2000	Neoprene, butyl or polyurethane, hard metal alloy, white cast iron
Casing Liners	Natural rubber on fabricated steel skeleton - ASTM D200	Neoprene, butyl or polyurethane
Casing	Ductile iron - ASTM 536	Extra high pressure cast steel ASTM A487 or ductile iron ASTM A536 (in selected sizes)
Shaft	Alloy steel AISI 4140	
Shaft Sleeve	Steel ASTM A5	316 SS ASTM A298 Hast C ASTM A494, Alloy 20 ASTM A351
Shaft Seal	Ful-Flush or Lo-Flo arrangement	Mechanical seal
Bearings -		
Frame 1 thru 4	Anti-friction angular contact ball	
Frame 5 thru 7	Anti-friction spherical with separate thrust	
Cashing Pedestal		
Frame 1 thru 5	Cast iron - ASTM A48	
Frame 6 and 7	Fabricated steel - ASTM A283	
Lubrication	Oil SAE 30	

# SRL Pump Performance Range

## SRL PUMP COVERAGE CHART\* 20 US GPM TO 1300 US GPM

## SRL TYPE C PUMP COVERAGE CHART\* 100 US GPM TO 1000 US GPM

\*NOTE: Use these charts as a guide only. Refer to individual performance curves for selection. SRL is an open impeller; SRL Type C is an enclosed impeller.

## Built-in Benefits

Liner push-out bolts; allows for easy removal of liners.

Replaceable molded rubber side plates and side liners; bonded to metal backing plates which prevent collapse under low suction pressure conditions.

Replaceable shaft sleeve; protects shaft from wear and is sealed with O-rings.

Shaft bearing assembly with oversize heavy duty anti-friction bearings (in oil-bath); totally enclosed for extended life in severe service.

Oil seals and rotating slinger; minimizes contamination and prevents loss of oil for longer bearing life.

ALSI 4140 steel oversize shaft; offers minimum shaft deflection and longer bearing and seal life.

Oversize oil drain and sight glass; allows for quick oil changes and a visual check for oil level.

Externally adjusted impeller; saves time by eliminating shut-downs for adjustments. Proper clearance between impeller and case is easily maintained.

DENVER slide-type maintenance base (optional); allows access to pump wet end without disturbing piping; integral grease lubricated low-friction nylon bearing pads; may be manually or power operated.

Pressure molded impeller; formed of DENVER special abrasion resisting rubber and permanently bonded to metal inserts to give required rigidity without sacrificing wear life.

Bolted-in-place liners; assure quick, accurate liner installation.

Slotted bolt holes; for quick removal.

Gland "weep" attachment; improves plant housekeeping.

- Gland water requirement at a minimum pressure of 10 psi above pump discharge pressure.
- These motors are above NEMA motor frame.
- \* Extra heavy duty cases in cast steel are available in 5x4 with a 360 psig rating and an 8x6 with a 400 psig rating.
- \*\* These sizes based on mounting clearances; check with factory for HP ratings of shaft and bearings.

WELDED OR VICTAULIC TYPE SUCTION AND DISCHARGE FLANGES ARE AVAILABLE

## Metso Slurry Pumps

### Our Range:

#### Orion and Thomas Series of Horizontal Rubber and Metal Lined Pumps

XR/XM, Extra Heavy Duty Pumps  
HR/HM, Heavy Duty Pumps  
MR/MM, Mining Duty Pumps  
Dredge Pumps

#### The Sala Series of Vertical & Horizontal Rubber and Metal Lined Pumps

VF, Froth Pumps  
VS, Sump Pumps  
VT, Tank Pumps  
ST, Recessed & Channel Impeller Pumps
